

Product Datasheet | HLA-C*07:02 easYmer® kit

Application	easYmers® are peptide loadable HLA class I monomers.

easYmers® can be used to generate peptide-HLA monomers with your choice of peptide. The monomers can easily be tetramerized with fluorophore conjugated streptavidin and used to analyse T cells by flow cytometry. The easYmer reagent can also be used to evaluate specific

peptide-HLA I binding.
